

NEEDS WORK

callminer.com — Communications Intelligence Report

2026-05-25 · 9 channels analyzed · 8 critical · 12 watch · 22 pass

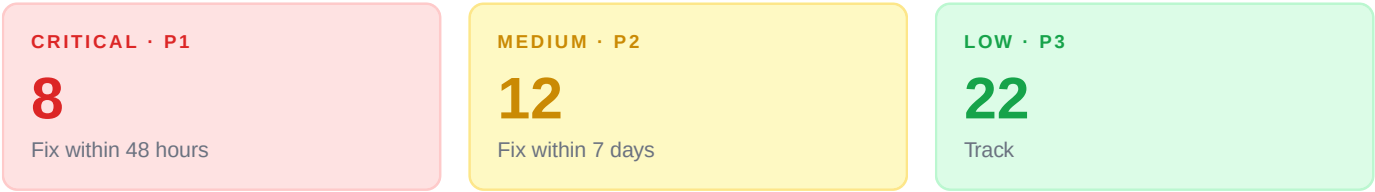

Run ID: cip-mpl9itvm

OVERALL RESULT

Site loads. Checkout is non-functional.

RISK SUMMARY

HOW TO READ THIS

Each finding in this report carries a CX Impact tag (High / Medium / Low) and a Fix Priority (P1 / P2 / P3). Counts above aggregate every channel. Critical findings should be remediated before the next quarterly comms review; medium findings before the next planning cycle.

BEFORE/AFTER DELTA

First scan establishes the baseline. Score deltas and resolved-finding counts appear here after the next scheduled re-scan.

CCAAS / UCAAS READINESS

Channel scores mapped to enterprise readiness pillars relevant to contact-center, unified-communications, AI-interaction, and compliance procurement reviews.

CCaaS Readiness Routing clarity (IVR audit) + landing-page clarity (Comms Clarity). Determines whether enterprise contact-center campaigns convert.	73/100 GAPS
UCaaS Readiness Email touchpoints + sender posture (SPF/DKIM/DMARC). Determines whether unified-comms workflows reach inboxes.	68/100 GAPS
AI-Interaction Readiness Discoverability + synthetic browser behavior + social presence. Determines whether AI agents can parse and represent the brand reliably.	92/100 READY
Enterprise Compliance Alignment TLS posture + GDPR/recording disclosures. Determines whether the surfaces survive procurement review.	55/100 AT RISK

CHANNEL FINDINGS

Comms Clarity — 85

SCOPE

Homepage.

FINDINGS

- ✓ Title present.
- ✓ Single H1 detected.
- ✗ 16 of 50 images missing alt text.
- ✓ 11 interactive elements detected.
- ✓ HTML payload 195 KB.
- ✓ Page loaded in 1420 ms.

REQUIRED ACTION

- Add alt text to remaining images.

Buyer Discoverability — 95

SCOPE

Homepage.

FINDINGS

- ✓ Meta description present.
- ✓ Open Graph image present.
- ✓ Open Graph title present.
- ✓ Twitter card present.
- ✗ Structured data (JSON-LD) missing.
- ✓ robots.txt returns 200.
- ✓ sitemap.xml returns 200.
- ✓ Ten internal links valid.

REQUIRED ACTION

- Add JSON-LD structured data.

Conversion Path — 65

SCOPE

Checkout path: /contact.

FINDINGS

- ✓ One checkout-style path detected.

- ✔ Checkout reachable (HTTP 200).
- ✘ No payment provider script detected.
- ✘ No Stripe, Swift, PayPal, Klarna, Shopify, or Adyen activity.
- ✘ No card frame rendered.
- ✘ No pay order button rendered.
- ✔ Trust signals: 5 of 5 present.
- ✘ Checkout cannot process transactions.

REQUIRED ACTION

- Restore payment provider integration.
- Confirm pay button renders after JS execution.

Email Touchpoints — 85

SCOPE

Homepage.

FINDINGS

- ✘ No ESP script detected.
- ✘ No email capture detected.
- ✘ No mailto link detected.
- ✔ Privacy and consent indicators present.

REQUIRED ACTION

- Add ESP integration if email automation is required.
- Add an email signup form.
- Add mailto contact link.

CHANNEL FINDINGS (CONTINUED)

Comms Surface Security — 50

SCOPE

DNS records of callminer.com.

FINDINGS

- ❌ No SPF record.1 · FIX 48H
- ❌ No DMARC record. FIX 48H
- ⚠️ No DKIM found at common selectors.
- ❌ No MX records.1 — domain cannot receive mail.
- ✅ TLS reachable on 2 comms surfaces.

REQUIRED ACTION

- Add SPF record.
- Add DMARC record (start at p=none for monitoring).
- Configure DKIM signing on the sending mail server.
- Add MX records.

RECOMMENDED DNS ADDITIONS

TXT [callminer.com](#)

```
v=spf1 include:<your-mail-sender> ~all
```

Adds SPF so receivers can verify authorized senders. Replace <your-mail-sender> with your ESP host (e.g. _spf.google.com, sendgrid.net, spf.protection.outlook.com, _custspf.one.com).

TXT [_dmarc.callminer.com](#)

```
v=DMARC1; p=none; rua=mailto:dmarc@callminer.com; fo=1
```

Starts DMARC in monitor mode. Aggregate reports arrive at dmarc@callminer.com (create that mailbox first, or use a free aggregator like postmarkapp.com/dmarc). After ~7 days of reports, you will know which IPs send mail under this domain. Then tighten to p=quarantine.

Social Presence — 90

SCOPE

Homepage.

FINDINGS

- ✅ Title captured.
- ✅ Description captured.
- ⚠️ Draft posts generated using fallback templates.
- ✅ Open Graph image present.

REQUIRED ACTION

- None.

Synthetic Comms Check — 90

SCOPE

Homepage + Checkout.

FINDINGS

- ✅ Rendered in 5129 ms.
- ⚠️ One JavaScript error. 7D
- ⚠️ No checkout path discovered in rendered DOM.

REQUIRED ACTION

- Resolve JavaScript errors.
- Surface a checkout path from the homepage DOM.

Comms Surfaces Inventory — 60

SCOPE

FINDINGS

- ⚠️ GET query returned 502.

REQUIRED ACTION

- None.

IVR Audit (Sample Data — production version scans your prospect's actual IVR) — 60

SCOPE

FINDINGS

- ✅ IVR audit — SAMPLE: BlueComm Communications (sample).
- ✅ Menu depth: 3 levels.
- ❌ A dead-end mode detected.
- ⚠️ A terminal hangup mode without agent transfer.
- ❌ No GDPR/privacy disclosure detected in any prompt.
- ✅ Call-recording disclosure present.
- ✅ Live agent transfer path available.

ⓘ Modern uses 2 menu options have changed" — known disengagement trigger.

REQUIRED ACTION

- None.

SUMMARY

Checkout is non-functional.

No payment provider loads.

No pay button renders.

Payment integration must be restored before the site can process orders.

AUDIT TRAIL

Generated by Pam on 2026-05-25 13:49:47 UTC.

Run identifier: cip-mpI9itvm.

Findings derived from automated scan.

Operator review recommended before external use.

Communications Intelligence Platform — structured, repeatable checks.
