RISK SUMMARY

HOW TO READ THIS

Each finding in this report carries a CX Impact tag (High / Medium / Low) and a Fix Priority (P1 / P2 / P3). Counts above aggregate every channel. Critical findings should be remediated before the next quarterly comms review; medium findings before the next planning cycle.

BEFORE/AFTER DELTA

First scan establishes the baseline. Score deltas and resolved-finding counts appear here after the next scheduled re-scan.

CCAAS / UCAAS READINESS

Channel scores mapped to enterprise readiness pillars relevant to contact-center, unified-communications, AI-interaction, and compliance procurement reviews.

CCaaS Readiness Routing clarity (IVR audit) + landing-page clarity (Comms Clarity). Determines whether enterprise contact-center campaigns convert.	70/100 GAPS
UCaaS Readiness Email touchpoints + sender posture (SPF/DKIM/DMARC). Determines whether unified-comms workflows reach inboxes.	70/100 GAPS
AI-Interaction Readiness Discoverability + synthetic browser behavior + social presence. Determines whether AI agents can parse and represent the brand reliably.	87/100 READY
Enterprise Compliance Alignment TLS posture + GDPR/recording disclosures. Determines whether the surfaces survive procurement review.	55/100 AT RISK

CHANNEL FINDINGS

Comms Clarity — 80

SCOPE

Homepage.

FINDINGS

- ✓ Title present.
- ✗ Multiple H1 tags detected (2).
- ✗ 14 of 46 images missing alt text.
- ✓ 24 interactive elements detected.
- ✓ HTML payload 533 KB.
- ✓ Page loaded in 1405 ms.

REQUIRED ACTION

- Reduce to a single H1 tag.
- Add alt text to remaining images.

Buyer Discoverability — 90

SCOPE

Homepage.

FINDINGS

- ✗ Meta description length 273 (50–160 recommended).
- ✓ Open Graph image present.
- ✓ Open Graph title present.
- ✓ Twitter card present.
- ✗ Structured data (JSON-LD) missing.
- ✓ robots.txt returns 200.
- ✓ sitemap.xml returns 200.
- ✓ Ten internal links valid.

REQUIRED ACTION

- Adjust meta description length to 50–160 characters.
- Add JSON-LD structured data.

Conversion Path — 95

SCOPE

Homepage. No checkout path detected.

FINDINGS

🚩 No checkout path detected on homepage.

✅ Trust signals: 5 of 5 present.

REQUIRED ACTION

- Add a discoverable checkout path from the homepage.

Email Touchpoints — 90

SCOPE

Homepage.

FINDINGS

✅ ESP detected: HubSpot.

🚩 No email capture detected.

🚩 No mailto link detected.

✅ Privacy and consent indicators present.

REQUIRED ACTION

- Add an email signup form.
- Add mailto contact link.

CHANNEL FINDINGS (CONTINUED)

Comms Surface Security — 50

SCOPE

DNS records of observe.ai.

FINDINGS

- ❌ No SPF record.1 · FIX 48H
- ❌ No DMARC record. · FIX 48H
- ⚠️ No DKIM found at common selectors.
- ❌ No MX records.1 — domain cannot receive mail.
- ✅ TLS reachable on 7 comms surfaces.

REQUIRED ACTION

- Add SPF record.
- Add DMARC record (start at p=none for monitoring).
- Configure DKIM signing on the sending mail server.
- Add MX records.

RECOMMENDED DNS ADDITIONS

TXT observe.ai

v=spf1 include:<your-mail-sender> ~all

Adds SPF so receivers can verify authorized senders. Replace <your-mail-sender> with your ESP host (e.g. _spf.google.com, sendgrid.net, spf.protection.outlook.com, _custspf.one.com).

TXT _dmarc.observe.ai

v=DMARC1; p=none; rua=mailto:dmarc@observe.ai; fo=1

Starts DMARC in monitor mode. Aggregate reports arrive at dmarc@observe.ai (create that mailbox first, or use a free aggregator like postmarkapp.com/dmarc). After ~7 days of reports, you will know which IPs send mail under this domain. Then tighten to p=quarantine.

Social Presence — 90

SCOPE

Homepage.

FINDINGS

- ✅ Title captured.
- ✅ Description captured.
- ⚠️ Draft posts generated using fallback templates.
- ✅ Open Graph image present.

REQUIRED ACTION

- None.

Synthetic Comms Check — 80

SCOPE

Homepage + Checkout.

FINDINGS

✅ Rendered in 19024 ms.

❌ 20 JavaScript errors X 48H

⚠️ No checkout path discovered in rendered DOM.

REQUIRED ACTION

- Resolve JavaScript errors.
- Surface a checkout path from the homepage DOM.

Comms Surfaces Inventory — 52

SCOPE

FINDINGS

✅ 52 unique public comms surfaces discovered.

✅ 13 of 25 surfaces respond on HTTPS.

⚠️ 12 surfaces unreachable.

✅ Comms surface mix — other: 6, marketing: 5, app: 1, support: 1.

REQUIRED ACTION

- None.

IVR Audit (Sample Data — production version scans your prospect's actual IVR) — 60

SCOPE

FINDINGS

✅ IVR audit — SAMPLE: BlueComm Communications (sample).

✅ Menu depth: 3 levels.

❌ 1 dead end node detected.

⚠️ 1 terminal hangup node without agent transfer.

- ❌ No GDPR/privacy disclosure detected in any prompt.
- ✅ Call-recording disclosure present.
- ✅ Live agent transfer path available.
- ⚠️ Modern UX 2 menu options have changed" — known disengagement trigger.

REQUIRED ACTION

- None.

SUMMARY

Checkout is non-functional.

No payment provider loads.

No pay button renders.

Payment integration must be restored before the site can process orders.

AUDIT TRAIL

Generated by Pam on 2026-05-25 13:48:44 UTC.

Run identifier: cip-mpI9hsrd.

Findings derived from automated scan.

Operator review recommended before external use.

Communications Intelligence Platform — structured, repeatable checks.
